Text: A Day in the Life of a Software Technician			
My name is Alex, and I work as a software technician. I (1) <u>regulary</u> start my day by checking my emails and (2) <u>always</u> attending a quick team meeting. In these meetings, we (3) <u>usually</u> discuss our current projects and (4) <u>rarely</u> share any updates on ongoing tasks.			
Once the meeting is over, I (5) <u>always</u> dive into my work. My primary responsibilities include (6) <u>write</u> code, (7) <u>analyze</u> software for errors, and (8) <u>report</u> any issues that arise. I (9) <u>often</u> spend a significant amount of time (10) <u>design</u> analyzing complex problems and finding solutions.			
I (11) <u>usually</u> work closely with the development team to (12) <u>desing</u> new features and improvements. Communication is key in our field, so I (13) <u>daily</u> send progress reports to keep everyone in the loop.			
I (14)rarelyencounter challenges, but I (15)always remain calm and focused. It's important to (16)update the software regularly to ensure its functionality. When I (17)attend find bugs or glitches, I (18)report them and provide detailed reports to the development team.			
At the end of the day, I (19) <u>usually</u> attend another brief meeting to (20) <u>update</u> any final updates and discuss plans for the next day.
